

# WORLD POPULATION DENSITY

Statistical distribution by persons per square kilometer ( $\text{km}^2$ )

0 - 10

11 - 50

51 - 100

101 - 500

500+

*(People /  $\text{km}^2$ )*

## Top 5 Densely Populated Regions

Region	Density
Macao SAR	~21,000
Monaco	~19,000
Singapore	~8,000
Hong Kong SAR	~7,000
Gibraltar	~3,300

## Student Analysis Guide

**Observe:** Identify the most populated coastal regions vs. inland areas.

**Correlate:** Compare the map with physical features like deserts, mountain ranges, and river basins.

**Predict:** How might climate change affect these density clusters over the next 50 years?
