

MIGRATION & HABITAT WATCHLIST

Annual Observation Report Year: 2024

SPECIES	MIGRATION ROUTE	ENDANGERED HABITAT & THREATS
Arctic Tern Critically Monitored	Pole to pole; Greenland to Weddell Sea, Antarctica.	Arctic Tundra & Coastal Islands Threat: Loss of nesting ground due to rising sea levels and overfishing.
Spoon-billed Sandpiper Endangered	East Asian-Australasian Flyway.	Intertidal Mudflats (Yellow Sea) Threat: Land reclamation and industrial coastal development.
Rufous Hummingbird Near Threatened	Mexico to Alaska / Pacific Northwest.	Mountain Meadows & Coastal Forests Threat: Wildfire frequency and loss of nectar-producing flora.
Great Knot Vulnerable	Siberian Tundra to Australia.	Wetlands & Estuaries Threat: Degradation of essential "refueling" stopovers in Asia.

Notes: Field observations should be recorded using GPS coordinates. Habitat status updated bi-annually.
