

Chronic Kidney Disease (CKD) Stages

Glomerular Filtration Rate (GFR) Reference Chart

Stage	Description	GFR Range (mL/min/1.73m ²)
Stage 1	Kidney damage with normal function	90+
Stage 2	Mild loss of kidney function	60 - 89
Stage 3a	Mild to moderate loss of function	45 - 59
Stage 3b	Moderate to severe loss of function	30 - 44
Stage 4	Severe loss of kidney function	15 - 29
Stage 5	Kidney failure (End-Stage Renal Disease)	< 15

Note: GFR is calculated based on blood creatinine levels, age, body size, and gender. Clinical diagnosis requires persistent markers of kidney damage for 3+ months.
