

CKD STAGING & LAB VALUES REFERENCE

STAGE	DESCRIPTION	EGFR RANGE (ML/MIN/1.73M ²)	CLINICAL STATUS
Stage 1	Kidney damage with normal function	90 or higher	Normal / Mild
Stage 2	Kidney damage with mild loss of function	89 - 60	Mild Decrease
Stage 3a	Mild to moderate loss of function	59 - 45	Moderate
Stage 3b	Moderate to severe loss of function	44 - 30	Moderate
Stage 4	Severe loss of function	29 - 15	Severe
Stage 5	Kidney Failure (ESRD)	Less than 15	End Stage

ADDITIONAL LABS	STANDARD RANGE	CKD SIGNIFICANCE
Albuminuria (UACR)	< 30 mg/g	Indicator of protein leakage
Serum Creatinine	0.7 - 1.3 mg/dL	Used to calculate eGFR

ADDITIONAL LABS	STANDARD RANGE	CKD SIGNIFICANCE
BUN	7 - 20 mg/dL	Waste product buildup monitoring

Note: eGFR = Estimated Glomerular Filtration Rate. Clinical diagnosis requires persistent results for 3+ months. This template is for educational reference only.
