

THE BUTTERFLY LIFE CYCLE

Stage One: The Egg

A tiny oval deposited on a leaf. Inside, the journey begins.

[Sketch: Leaf with Egg]

Stage Two: The Larva

Known as the caterpillar, focusing entirely on growth and nourishment.

[Sketch: Caterpillar]

Stage Three: The Pupa

The chrysalis phase where transformation occurs in stillness.

[Sketch: Chrysalis]

Stage Four: The Adult

The imago emerges, drying its wings for the first flight.

[Sketch: Butterfly]
