

VINTAGE SEWING MACHINE

Universal Threading Reference & Maintenance Chart

PRO TIPS:

- Always thread with the presser foot UP.
- Turn handwheel TOWARD you only.
- Use high-quality cotton or polyester thread.

SPOOL PIN

Place thread spool on the pin. Secure with a felt washer to prevent spinning friction.

THREAD GUIDE

Pass thread through the top rear guide to align it with the tension discs.

TENSION DISCS

Pull thread firmly between the metal discs. Ensure it seats deeply into the spring.

TAKE-UP LEVER

Bring thread up and through the hole in the take-up lever (right to left).

NEEDLE BAR GUIDE

Slide thread through the final guide located just above the needle clamp.

THE NEEDLE

Thread the needle eye from the side of the last thread guide (usually left to right).

Model Ref: _____ Date: 2024 Notes: Always oil before use.
