

ANATOMY OF THE HUMAN BRAIN

[Illustration Placement]

- 1. Frontal Lobe** Executive function, impulse control, and motor performance.
- 2. Parietal Lobe** Sensory information processing and spatial orientation.
- 3. Occipital Lobe** Primary visual processing center of the mammalian brain.
- 4. Temporal Lobe** Processing auditory input and encoding of memory.
- 5. Cerebellum** Regulation of muscular coordination and balance.
- 6. Brainstem** Relays signals between brain and spinal cord; controls autonomic functions.
